

68 images,  
4 devices

```
graph LR; A[68 images, 4 devices] --> B[25 folds (repeated stratified 5-fold CV)]; B --> C[Method-specific preprocessing]; C --> D[Features and classifier, fitted on training folds]; D --> E[Predicted device for held-out images];
```

The diagram is a horizontal flowchart with five rectangular boxes connected by right-pointing arrows. Each box contains text describing a step in a process. The first box contains '68 images, 4 devices'. The second box contains '25 folds (repeated stratified 5-fold CV)'. The third box contains 'Method-specific preprocessing'. The fourth box contains 'Features and classifier, fitted on training folds'. The fifth box contains 'Predicted device for held-out images'.

25 folds  
(repeated  
stratified  
5-fold CV)

Method-  
specific  
preprocessing

Features and  
classifier,  
fitted on  
training folds

Predicted  
device for  
held-out  
images
